Continuation of 11. does NOT place the application in condition for allowance because: The applicant has argued that the applied art does not teach the applicant's invention, because one of ordinary skill in the art would only understand a "thinning process" to be one in which material is removed. The applicant further cites examples of thinning processes as wet etching, dry etching and hybrid damage/wett etching. However, the arguments by the applicant's attorney do not amount to obejctive evidence as to what one of ordinary skill in the art would understand. Further, if the applicant wants to explictly state that the thinning process is an etching step, then the independent claim should be amended so as to recite such a feature.
